A
Pearson correlation
sampling inverse temperature β
regularization γ
B
$k=1$
$k=2$
$k=3$
$k=4$
$k=5$
$k=6$
$\sum_{k>6}\sigma_k^2$
$\sigma_k^2(\beta)$
$\sum_{k>6}\sigma_k^2(\beta)$
β_{opt}=1.65
sampling inverse temperature β
C
SBM prediction $\beta^\star$
empirical β_{opt}
optimal sampling β
regularization γ
