A
Pearson correlation
sampling inverse temperature β
regularization γ
B
$k=1$ $k=2$ $k=3$ $k=4$ $k=5$ $k=6$ $\sum_{k>6}\sigma_k^2$
$\sigma_k^2(\beta)$
$\sum_{k>6}\sigma_k^2(\beta)$
$\beta_{\text{opt}}=1.50$
sampling inverse temperature β
C
SBM prediction $\beta^\star$
empirical β_{opt}
optimal sampling β
regularization γ
